

Covered Bonds

At-A-Glance

Covered bonds are senior, secured debt securities of a regulated financial institution. If the issuing bank defaults, the collateral, referred to as the covered pool, is used to make up any payment shortfall due on the covered bonds. So long as there is sufficient collateral, covered bonds are not accelerated, but rather paid on their scheduled payment dates. If the cover pool at any time is inadequate to make all scheduled payments, all outstanding covered bonds are accelerated and paid pro rata from the proceeds of the cover pool.
